- Critical thinking skills
- Information verification skills
- Proficiency in synthesizing information and drawing conclusions
- Information transfer skills
- Inquisitiveness and meticulousness
- Curiosity in the area of markets, corporations and global business
- Strong communication skills
- Flexibility

## Requirements:

- Experience of 2-3 years in a related position, e.g , in strategy departments, consulting companies
- Fluency in English (minimum C1)
- Skills in using digital tools (google workspace, office suite)
- Excel advanced knowledge

## Additional knowledge of the following is of benefit:

- Spanish language skills
- Higher education or in the final years of studies in the following fields: economics, international trade, global business
- Working knowledge of R language, google data studio, Power BI

## We can offer:

- Exciting and challenging work in the development of technology companies - you will acquire extensive knowledge of the Venture Capital and deep tech market through cooperation and learning from experienced colleagues
- Support of your superiors in the development of knowledge and skills,
- Opportunity for promotion in the structures of the Fund
- Work in international teams
- Tangible impact on the development strategy and company image
- Secure employment based on an employment contract or other preferred form of employment (B2B for candidates from outside EU)
- Place of work: Warsaw or possibility to work remotely or in a hybrid system
- A friendly, non-corporate atmosphere.

## About the projects:

Fresh Inset S.A. - is a food tech company that has developed and patented a unique technology that is a global revolution in the post-harvest protection of fruits and vegetables (extending the freshness of harvested fruits and vegetables). The company is addressing the global problem of fruit and vegetable spoilage throughout the logistics and distribution chain, which accounts for 50% of fruit and vegetable losses.

Noctiluca S.A. - NewConnect-listed technology company developing advanced compounds in photonics, which manufacturers of OLED displays and panels use. Noctiluca develops and manufactures third- and fourth-generation OLED emitters, i.e., those exhibiting TADF properties, which are a crucial component of displays (monitors, TVs, smartphones, wearables, or VR devices) and light sources.
